

April 9th, 2026

Dear FAO Community,

For more than 30 years, it has been my privilege to care for your vision. As our practice evolves, I wanted to share an important update.

Over the years, I have developed a special focus in low vision rehabilitation, helping patients with significant vision loss maximize their remaining sight and maintain their independence. The need for this specialized care continues to grow, and I will be dedicating more of my clinical time to these complex services.

Please know that I am not stepping away from the practice. I will continue caring for my existing patients and remain actively involved in managing complex medical eye care, specialized dry eye treatment, and primary eye care. However, my availability for routine primary care appointments will be more limited as I shift my focus toward low vision rehabilitation.

To ensure you continue to receive timely, comprehensive care, I am pleased to welcome Dr. Wong to our primary care team. Dr. Wong will be taking on many of my routine primary care appointments while working closely with me, Dr. Stevens, and Dr. Bandali. We collaborate closely and share the same commitment to providing the high standard of care you have come to expect.

Thank you for your trust and support over the years. I look forward to continuing to care for you as part of our outstanding team.

With gratitude,

Dr. Papadakis
